Licenses Required, in addition to a Pennsylvania hunting license, to hunt ducks and geese:

Persons 16 and older – Federal Duck Stamp, signed in ink across its face, and Migratory Game Bird License (HIP).

Persons 12 through 15 – Migratory Game Bird License (HIP).

A valid Migratory Game Bird License (HIP) is also required to hunt other migratory game birds, including doves, woodcock, coots, gallinules, rails and snipe. If you purchased a HIP license last year, be sure to provide your last year's migratory game bird harvest results when asked. By answering these questions you will be entered into a pool of hunters from which samples for federal harvest surveys are drawn. Your responses to the questions improve efficiency and the quality of the information used to monitor the harvest of migratory birds for management purposes.

Voluntary PA Duck Stamp – Helps finance wetland acquisition and development and waterfowl education.

Band Reporting: online at www.reportband.gov, or call TOLL-FREE, 1-800-327-2263.

Please note that the following material is only a summary. Each hunter should also consult the actual Federal Regulations found in Title 50, Code of Federal Regulations, Part 20. In addition to Pennsylvania regulations, the following federal rules also apply to the taking, possession, shipping, transporting and storing of migratory game birds.

Restrictions: No person shall take migratory game birds:

- With a trap, snare, net, rifle, pistol, revolver, swivel gun, shotgun larger than 10-gauge, punt gun, battery gun, machine gun, fish-hook, poison, drug, explosive or stupefying substance.
- With a shotgun capable of holding more than three shells, unless it is plugged with a one piece filler which is incapable of removal without disassembling the gun.
- From a sink box (a low floating device, having a depression affording the hunter a means of concealment beneath the surface of the water).
- From or with the aid or use of a car or other motor-driven land conveyance, or any aircraft.
- From or by means of any motor boat or sail boat unless the motor has been completely shut off and/or the sail furled, and its progress therefrom has ceased.
- By the use or aid of live decoys. All live, tame or captive ducks and geese shall be removed for a period of 10 consecutive days prior to hunting, and confined within an enclosure which substantially reduces the audibility of their calls and totally conceals such tame birds from the sight of migratory waterfowl.
- Using records or tapes of migratory bird calls or sounds, or electrically amplified imitations of bird calls.
- By driving, rallying or chasing birds with any motorized conveyance or any sailboat to put them in the range of hunters.
- By the aid of baiting (placing feed such as corn, wheat, salt or other feed to constitute a lure or enticement), or on or over any baited area. Hunters should be aware that a baited area is considered to be baited for 30 days after the removal of the bait.

Closed Season: No person shall take migratory game birds during the closed season.

Waterfowl hunting is not permitted on Sundays.

Shooting or Falconry Hours: No person shall take migratory game birds except during the hours open to shooting and falconry as prescribed.

Daily Bag Limit: No person shall take in any one day more than one daily bag limit.

Field Possession Limit: No person shall possess more than one daily bag limit while in the field or returning from the field to one's car, hunting camp, home, etc.

Wanton Waste: All migratory game birds killed or crippled shall be retrieved, if possible, and retained in the custody of the hunter in the field.

Tagging: No person shall give, put or leave any migratory game birds at any place or in the custody of another person unless the birds are tagged by the hunter with the following information: the hunter's signature and address; the total number of birds involved, by species; and the dates such birds were killed. No person or business shall receive or have in custody any migratory game birds belonging to another person unless such birds are tagged.

Possession of Live Birds: Wounded birds reduced to possession shall be immediately killed and included in the daily bag limit.

Dressing: No person shall completely field dress any migratory game bird (except doves) and then transport the birds from the field. The head or one fully feathered wing must remain attached to all such birds while being transported from the field to one's home or to a migratory bird preservation facility.

Nontoxic Shot, Shot Size: NONTOXIC SHOT must be used while hunting ducks, geese and/or coots in Pennsylvania; the possession of lead shot while hunting ducks, geese and/or coots is unlawful. Shot for waterfowl hunting may not be larger than T size. Nontoxic shot types approved by the U.S. Fish & Wildlife are: Steel shot, steel shot with coating (1% of either copper, nickel, zinc chromate, or zinc chloride), bismuth-tin, tungsten-iron, tungsten-polymer, tungsten-matrix and tungsten-nickel (HEVI-SHOT), tungsten-bronze-iron shot, tungsten-tin-bismuth, and tungsten-tin-iron-nickel.

On Sept. 14 and 21 hunting hours close at sunset for Canada geese. For all other Canada goose seasons, the snow goose regular season, and all other migratory game bird seasons (except for the first split of the mourning dove season), hunting hours are one-half hour before sunrise to sunset. The accompanying table lists, by date, one half hour before sunrise and sunset times. To determine actual hunting hours for the September Canada goose season, add 30 minutes to the sunset times. These adjustments need to be made in addition to those based on the meridian map.

Open to licensed junior hunters ages 12-15, when properly accompanied, for ducks, mergansers, gallinules and coots, and Canada goose as permitted. Same daily bag limits as regular season. Hunting hours to close at sunset. Blinds will not be open for these two days at Middle Creek or Pymatuning WMAs.

WATERFOWL CONSUMPTION ADVISORY: In a recent Pennsylvania Game Commission study of Lake Erie waterfowl, contaminants such as PCBs, DDE, and mercury were found in all mergansers tested, as well as in some buffleheads. These contaminants may also be present in other Pennsylvania waterbodies and contaminated waterfowl could migrate to other areas of the Commonwealth. To avoid potential health impacts, the Game Commission offers the following advice on waterfowl consumption, applicable statewide: 1.) Mergansers should not be eaten; 2.) Other diving ducks if properly prepared should be eaten only occasionally; and 3.) Dabbling ducks and geese can be eaten safely if properly prepared. Proper preparation includes skinning and removing the fat before cooking; cooking to an internal temperature of 165 F as determined by a meat thermometer; and discarding the stuffing (if prepared in this manner) after cooking.
